

Lava™ Precision Solutions

Upgrade to a Natural Beautiful Smile

Are you paying monthly dental insurance?

Has your dentist advised that you need a restoration?

If so, you may know that the lab fees associated with any restoration are not covered by most plans.

Why not give your smile a brighter future and upgrade your standard porcelain fused to metal restoration to a 3M™ ESPE™ Lava™ Restoration for an extra lab charge - ask your dentist for further information!

Turn overleaf to see why this will give you something to smile about....

3M ESPE

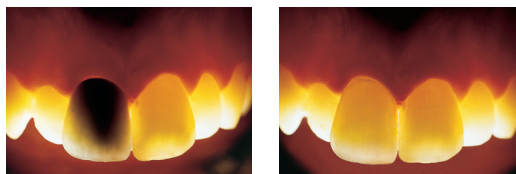

Lava™ Crowns and Bridges are as natural as nature itself....

- Made from a ceramic material similar to the natural enamel of your teeth (zirconia).
- The zirconia has such a natural appearance that it can barely be distinguished from natural teeth.
- The inner layers are coloured to match the individual colour of your teeth and then finished to completely match neighbouring teeth.

*A Lava bridge
in position
in the mouth*

Unlike conventional crowns and bridges with metal-based cores, 3M™ ESPE™ Lava™ Restorations contain absolutely no metal so you will see no dark lines where your tooth meets the gum.

*The difference between
a metal crown and
a Lava crown when
a light shines through*

Lava restorations are biocompatible and extremely durable.....

- They are made from natural raw materials and contain nothing that is likely to cause a reaction in your mouth
- They can be used for teeth both at the front and at the back of your mouth
- They can withstand high levels of stress exerted when you chew or bite - we are so confident we guarantee Lava restorations for 5 years!

**Your smile deserves something more precious than metal
so ask your dentist today for a Lava™ restoration.**
